

# Case Study: The Express Lane for Lighting Incentives

## Project Details

### Project Location

City of Industry, CA

### Building Type

Unconditioned Storage

### Incentive Amount

\$7,698

### Distributor Name

Sierra Energy Solutions

### Electric Utility

Southern California Edison

### Est. Energy Savings

23,475 kWh

Sierra Energy Solutions leveraged Illuminate California incentives to help a customer replace old, inefficient lighting with 445 highly efficient LED high bays in two unconditioned storage facilities. The upgrade not only reduced the facility energy use by about half, but also improved staff visibility and safety by increasing light levels.

The program incentives motivated the customer to move forward quickly with the energy efficient LED installations, instead of waiting a few years to make the upgrades. Tom Hamar of Sierra Energy Solutions said Illuminate California’s lucrative high bay incentives make the program the best choice for his customers in many building categories, including refrigerated and non-refrigerated storage. Illuminate California also provided a streamlined process that Tom said moves projects from submission to payment quicker than other incentive programs.

It’s a very smooth-running program. It’s the most streamlined program in California that I’m aware of and that I’m taking part in. This lighting program offers an express lane to incentives.”

**Tom Hamar**

## Equipment Details

### LED High Bay Luminaire

**Quantity:** 445

**Efficacy:** 135–150 Lumens per Watt

**Lumens:** 23,100–30,000

**Contact us to become a Program Partner and receive incentives for your next lighting upgrade project.**

Southern California Edison Company, on behalf of itself, Pacific Gas and Electric Company, and San Diego Gas and Electric Company, has contracted with TRC Solutions Inc. (TRC) to design and implement an energy efficiency program and to deliver the resulting energy and demand savings to SCE. TRC’s program is a statewide midstream lighting program for qualifying non-residential customers. Customers receive services and/or compensation directly, or indirectly, from TRC based on individual agreements between the customer and TRC or TRC’s subcontractors (Customer Agreement). SCE is not a party to, or a guarantor of, the Customer Agreement. SCE has no contractual obligation, directly or indirectly, to the customer. SCE is not liable for any actions or inactions of TRC, or any distributor, vendor, installer, or manufacturer of product(s) purchased. SCE does not recommend, endorse, qualify, guarantee or make any representations or warranties regarding the services, work, quality, financial stability or performance of TRC or any of TRC’s distributors, contractors, subcontractors, installers of products, or any product brand listed on TRC’s website or provided, directly or indirectly, by TRC. Prior to entering into a Customer Agreement, customers should thoroughly review the terms and conditions of such Customer Agreement so they are fully informed of their rights and obligations under the Customer Agreement, and should perform their own research and due diligence, and obtain multiple bids or quotes when seeking a contractor to perform work of any type. TRC is responsible for meeting their contractual obligations to SCE. If TRC fails to meet their contractual obligations to SCE under their agreement with SCE, SCE may have the right to terminate the agreement between SCE and TRC.
